RE: FCC ID/ PH3DJ-MD40

To Whom It May Concern:

Subject: Attestation Statement for the spectrum efficiency of Portable Digital Radio

Dear Sir,

We, Alinco, Incorporated, hereby declare that the Time Division Multiple Access (TDMA) technology provides two paths in 12.5KHz channel bandwidth, thus meeting the one voice path per 6.25KHz of spectrum requirement. This radio also provides data rate at 9600 bps in 12.5KHz channel bandwidth, and meet the minimum data rate at 4800 bps in 6.25KHz channel bandwidth

To my best of knowledge, above statement is true.

Yours Sincerely,

---

Kazuhiro Kusuhara  
Division manager & Executive officer  
Alinco, Inc. Electronics Division
