| Peak |  <p>Level (dBuV/m) vs Frequency (MHz) for Horizontal polarization. The plot shows a signal level starting around 105 dBuV/m at 2462 MHz, dropping to about 70 dBuV/m by 2477 MHz, and then fluctuating between 50 and 60 dBuV/m up to 2500 MHz. A red vertical line is at 2484.8 MHz, and a red horizontal line labeled 'PEAK_BE_74' is at approximately 74 dBuV/m.</p>                                                                                                                                                                           |        |       |       |        |        |  <p>Level (dBuV/m) vs Frequency (MHz) for Fundamental polarization. The plot shows a flat noise floor around 40 dBuV/m from 1000 to 2400 MHz, followed by a sharp peak at 2462 MHz reaching approximately 101 dBuV/m, and then returning to the noise floor. A red horizontal line labeled 'PEAK_74' is at approximately 74 dBuV/m.</p> |       |                 |      |     |       |        |      |      |  |      |       |      |      |       |        |      |        |  |        |     |        |        |  |      |      |    |    |    |     |   |         |       |       |       |       |       |      |       |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |  |  |  |  |       |        |      |     |       |        |      |      |  |      |       |      |      |       |        |      |        |  |        |     |        |        |  |      |      |    |    |    |     |   |         |        |       |       |       |       |      |       |

| Avg  |  <p>Level (dBuV/m) vs Frequency (MHz) for Horizontal polarization. The plot shows a smooth curve starting at ~85 dBuV/m at 2462 MHz, dropping to ~70 dBuV/m at 2477 MHz, and then gradually decreasing to ~40 dBuV/m at 2500 MHz. A red vertical line is at 2484.8 MHz, and a red horizontal line labeled 'AVG_BE_54' is at approximately 54 dBuV/m.</p>                                                                                                                                                                                         |        |       |       |        |        |  <p>Level (dBuV/m) vs Frequency (MHz) for Fundamental polarization. The plot shows a smooth curve with a sharp peak at 2462 MHz reaching approximately 91 dBuV/m, and then returning to a noise floor around 40 dBuV/m. A red horizontal line labeled 'AVG_54' is at approximately 54 dBuV/m.</p>                                      |       |                 |      |     |       |        |      |      |  |      |       |      |      |       |        |      |        |  |        |     |        |        |  |      |      |    |    |    |     |   |         |       |       |       |       |       |      |       |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |  |  |  |  |       |        |      |     |       |        |      |      |  |      |       |      |      |       |        |      |        |  |        |     |        |        |  |      |      |    |    |    |     |   |         |        |       |       |       |       |      |       |
