Date: 3rd August 2022

Subject: Calibration

FCC: QWP-60V2000

IC: 109AO-60V2000

To whom it may concern

We, Cambium Network Ltd, hereby attest that the 60 GHz cnWave V2000 RF Tile, SSPXA-001326 (QD-46), is calibrated at the supplier's factory to verify the platform baseline operation at maximum supported EIRP, the RF Tile performance is verified by Cambium Networks in Device Verification Testing.

The 60 GHz cnWave V2000 operational software requires the selection of a country code that applies relevant parameter changes to ensure operation within the regulations of the country where the 60 GHz cnWave V2000 is installed.

Once the device has left the factory, the user does not have access to the device to increase the output power, the country setting limits the V2000 operation to local regulations.

Yours faithfully,

Donald W Reid
CEng MIET, MInstLM
Senior Principal Regulatory Engineer
Cambium Networks Ltd.
