

16 February 2023

Tait International Limited declares under its sole responsibility that for radio equipment compliance purposes Tait hand portable radio transceivers carrying the Type Code **TPHN0A** are electrically identical.

The differences between them are in the front panel appearance, the fitting or absence of a keypad and the provision or otherwise of software-controlled features. The changes do not affect the RF performance and regulatory compliance of the radios.

Yours sincerely,

Brian Emmett

Standards and Regulatory Manager
