

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Unit Test) housing. The housing is a dark red plastic frame. Inside, there is a green printed circuit board (PCB) with a large, circular, silver-colored component (likely a coil or inductor) and several smaller electronic components. A white ribbon cable is connected to the board. The assembly is placed on a blue surface next to a black ruler with white markings for scale.
Solder Board-Component View 1	 A photograph showing a close-up view of the solder board-component assembly. The green PCB is visible, with the circular silver component and various electronic components. A white ribbon cable is connected to the board. The assembly is placed on a blue surface next to a black ruler with white markings for scale.

Solder Board-Component View 2	 A photograph showing a green printed circuit board (PCB) with various electronic components, including a USB connector, integrated circuits, and capacitors. The board is connected to a large, rectangular, multi-layered inductor or transformer component. A black ruler with white markings is placed horizontally below the components for scale. The background is a blue textured surface.
Solder Board-Component View 3	 A photograph showing the same green PCB and components as in View 2, but with an additional small, circular, multi-layered inductor component connected to the board. The large rectangular component is also present. A black ruler with white markings is placed horizontally below the components for scale. The background is a blue textured surface.

Solder Board-Component View 4	 A photograph showing a green printed circuit board (PCB) with various electronic components. A white, rectangular, flexible antenna is connected to the board via several thin wires. A black, circular component is also connected to the board. The assembly is placed on a blue background with a black ruler for scale.
Antenna View	 A photograph showing the antenna components from a different perspective. A circular antenna is connected to the PCB by a yellow wire. A larger, rectangular antenna with a complex internal pattern is also connected to the PCB by a yellow wire. Red boxes highlight these two antenna components, with labels "Wireless 2 Charging Antenna" and "Wireless 1 Charging Antenna" pointing to them. The assembly is placed on a blue background with a black ruler for scale.
