Columbia, MD 21046

Subject: Attestation statement regarding the Mobile Radio frequency

Applicant: President Electronics USA
1007 Collier Center Way, Naples, Florida 34110, USA

TYPE OF EQUIPMENT: Licensed Non-Broadcast Station Transmitter
FCC ID: 2AEOCPC201

Dear Sir or Madam

I attest that the product has one antenna, one battery capacity and one body-worn and audio accessories.

And that the product could program the frequency on computer through interface by manufacturer, is incapable of tuning, or readily being altered, by the end-user.

I attest that the dissipation rating of all the semiconductors or electron tubes which supply RF power to the antenna terminals of each CB transmitter must not exceed 4 W. For semiconductors, the dissipation rating is the greater of the collector or device dissipation value established by the manufacturer of the semiconductor. These values may be temperature de-rated by no more than 55 °C. For an electron tube, the dissipation rating is the Intermittent Commercial and Amateur Service plate dissipation value established by the manufacturer of the electron tube.

I attest that the serial number of each CB transmitter must be pasted on the transmitter chassis.

Please contact the undersigned if you have any questions or need any further information.

Regards
