

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing the conducted emission test setup. A black electronic device is placed on a wooden table. To its left, a silver power supply unit is connected to the device. In the background, a yellow bench is visible with various electronic equipment and cables. The setup is in a laboratory environment with a grey wall and a power outlet.
Radiation Emission View (Below 30MHz)	 A photograph showing the radiation emission test setup. The black electronic device is placed on a wooden table in a room with white and blue acoustic foam on the walls. A metal frame structure is positioned in front of the device, and a yellow and black striped caution tape is on the floor. The setup is in a laboratory environment with a grey floor and a power outlet.
