Class II permissive change request letter

Manufacturer: Telit Communications S.p.A.

Model: LE910-NA1

FCC ID: RI7LE910NAV2

We, Telit Communications S.p.A., pursuant FCC §2.1043, hereby request the evaluation of a Class II permissive change as described below for the Telit LE910-NA1.

The changes made to the currently certified model are firmware related and do not degrade the characteristics currently reported and accepted.

No changes to transmit power output, modulation or frequency have been made.

The main changes introduced in the device:

- New main SW feature: VoLTE support
- FDD Band 17 was inhibited by Software configuration

Therefore, the LE910B1-NA model can be considered to be electrically identical to the corresponding already assessed radio module LE910-NA1.

New user manuals for these models have been developed to describe the firmware commands, following the general format of the certified models.

Yours sincerely,
