Declaration of Professional Installation

To whom it may concern,

We, FLARM Technology AG, produce a line of aviation radios which are integrated into aircraft and UAVs by qualified professionals. On our most recent product, the Atom UAV MMCX, we declare that we are exempt to the requirements of 47 CFR § 15.203 as this product is intended for professional installation only.

Based on the requirements of KDB 353028 D01, we affirm the following.

1) Hardware Availability

An average consumer cannot access our website and purchase our equipment via an online storefront. The sales channel for this product is through our network of authorized dealers or directly to installers.

2) Marketing

The device is not sold via retail to the general public or by mail order, it is only marketed to authorized dealers or installers.

3) Intended Use / Unique Nature

By its commercial nature, aviation radios are not intended for the general public, and each installation is a custom project which depends on the aircraft dimensions and clearances, such that each installation must be performed by a licensed professional. Additionally, outside aviation regulators also require review of the installation of the product to ensure it meets applicable aviation regulatory requirements.

4) Controlled Installation

Installation is controlled to only aircraft or UAVs who require our product for safety purposes. There is no other end user of this product but custom installations in aircraft.

5) Installation by Licensed Professionals

Any dealer or installer of our product receives detailed installation guides and training materials in order to integrate the product.

6) Training of Licensed Professionals

All dealers and installer are required to go through our training process and materials in order to purchase our product and install the product.

Sincerely,

Signature:
