

Antenna Installation

Danger: The installer of this radio equipment must ensure that the antenna is located or pointed such that it does not emit RF field in excess of Health Canada limits for the general population; the antenna must be positioned such that it is a minimum of 3 meters from the general public; consult Safety Code 6, obtainable from Health Canada's website <http://www.hc-sc.gc.ca>

Danger: Verify that the Griffin unit is powered off prior to installing or adjusting the antenna. The antenna may radiate harmful levels of RF energy within 10cm of any part of the antenna, endangering professional installation staff.

To install the antenna, perform the following steps:

Step	Action
1	Install the antenna bracket (integral to the antenna kit) to the enclosure. The enclosure is equipped with threaded posts (at four locations) to allow for a variety of antenna mounts and to allow the installer to chose the best Line of Sight (LOS) mounting location. The following picture shows two types of antennas and mounting brackets.
