Re: Request for Reduction in AMPS Power

Kyocera Wireless Corporation (KWC) herein submits this request to reduce the AMPS power level on the grant for ID: OVFQCP-3035.

Applicant: Kyocera Wireless Corporation  
10290 Campus Point Drive  
San Diego, CA 92121-1522

Manufacture: Kyocera Wireless Corporation  
10300 Campus Point Drive  
San Diego, California 92121

During the post grant period, we have discovered that the device had increased in SAR from the original filing. The manufacturer of our speaker had changed magnetic suppliers causing a shift up in the SAR value. To insure that the phone remains in compliance with the SAR limit, we are requesting to have this ID AMPS value reduced to 500 mW. New SAR data has been submitted on a phone tested at this level.

Please send all requests for information to Robert Scodellaro and myself. Our email addresses are as follows:
