

Key	Main Function	Definition
	SHIFT	Press and release the SHIFT key to activate the keypad alternate SHIFT functions. The icon appears on the taskbar. Press and release the SHIFT key again to return to the normal keypad functions.
	Function change	The  key is used in combination with other keys to type special characters and perform system functions.
	Enter	This key confirms data entry

Table 2-4 Definition of main Function

2.4.8.1 Special Function by “Fn” + main Function

The “Fn” key is used in combination with other keys to type special characters and perform system functions.

Key Sequence	Fn + Main Function	Definition
 	Increase of Brightness	Increase the LED backlight brightness of display screen(Lighter) You must press  key, then press  key to increase backlight brightness each time.
 	Decrease of Brightness	3. Decrease the LED backlight brightness of display screen (darker) 4. You must press  key, then press  key to decrease backlight brightness each time.

Key Sequence	Fn + Main Function	Definition
 	Page Down	3. Move the cursor down one page. The cursor will move continuously if button is pressed continuously. 4. You must press  key, then press  key to cursor down one page each time.
 	Page Up	3. Move the cursor up one page. The cursor will move continuously if button is pressed continuously. 4. You must press  key, then press  key to cursor up one page each time.
 	F5 (Barcode Settings)	Application key 5, User can define F5 function from setting.
 	F6 (Media Player)	Application key 6, User can define F6 function from setting.
 	F7 (Calculator)	Application key 7, User can define F7 function from setting.
 	F8 (Information)	Application key 8, User can define F8 function from setting.
 	(	Enter a (by pressing  key, then pressing  key.
 	)	Enter a) by pressing  key, then pressing  key.
 	[	Enter a [by pressing  key, then

		pressing  key.
		Enter a  by pressing  key, then pressing  key.
		Enter a  by pressing  key, then pressing  key.
		Enter a  by pressing  key, then pressing  key.
		Enter a  by pressing  key, then pressing  key.
		Enter a  by pressing  key, then pressing  key.
		Enter a  by pressing  key, then pressing  key.
		Enter a  by pressing  key, then press  key.
		Enter a  by pressing  key, then press  key.

Key Sequence	Fn + Main Function	Definition
 		Enter a  by pressing  key, then pressing  key.
 		Enter a  by pressing  key, then pressing  key.
 		Enter a  by pressing  key, then pressing  key.
 		Enter a  by pressing  key, then pressing  key.
 		Enter a  by pressing  key, then pressing  key.
 		Enter a  by pressing  key, then pressing  key.
 		Enter a  by pressing  key, then press  key.
 		Increases device volume, press  key and then press  key.
 		Decreases device volume, press  key and then press  key.
 		Enter a  by pressing  key, then

Key Sequence	Fn + Main Function	Definition
		pressing  key.
 	/	Enter a / character by pressing  key, then pressing  key.
 	@	Enter a @ by pressing  key, then pressing  key.
 	,	Enter a ' by pressing  key, then pressing  key.
 	+	Enter a + by pressing  key, then pressing  key
 	Paste	To do a paste function by pressing  key first, and then pressing  key each time.
 	Del	To do a delete action, press  key first, and then press  key.
 	-	Enter a - by pressing  key, then pressing  key.
 	Copy	To do a copy action, press  key, then press  key.
 	&	Enter a & by pressing  key, then

Key Sequence	Fn + Main Function	Definition
		pressing  key.
	*	Enter a * by pressing  key first, and then pressing  key.
	Start Menu	To display Start menu press  key first, and then pressing  key each time.
	Space	Enter a Space character by pressing  key first, and then pressing  key each time.

Table 2-5 Special Function key define

2.4.9 Using the Ear/Microphone

Connect the ear/microphone set to PDT earphone jack connector. The PDT has no built in microphone, if you like to record the voice, you have to the use ear/microphone set.

Figure 2-16 Ear/microphone

2.5 Navigating the Display

2.5.1 Setting Time and Date

In the Date/Time options, you can change the year, month, date, time, time zone, or select automatic adjust for daylight saving time. To set or change the date and time:

1. Select Start > Settings > Control Panel > Date/Time.
2. To change the year, select the year. Select the up arrow to increase the value, select the down arrow to decrease the value. Or you can type a new value in the field.
3. Select the month to open a pull-down list of months or press the arrow buttons to either side of the month to increase or decrease the month.
4. To change the time, select the hour, minute, seconds, or AM/PM and select the up arrow to increase the value; select the down arrow to decrease the value. Or you can type a new value in the field.
5. Select your correct time zone from the pull-down list.
6. To automatically adjust the clock for daylight saving time, enable the checkbox at the bottom of the screen.
7. Select **Apply** to save your changes or select **OK** to exit the **Date/Time** settings.

Figure 2-17 Date/Time properties

2.5.2 Entering the Data

To select and open programs, select **Start > Programs** from the task bar to open a list of available programs. If the program has an icon on the desktop, double-tap to open it. There are several ways to enter data in an application on the PDT:

- Use the keypad to enter alpha-numeric characters, Refer to “2.4.7 Using the PHL-7100 keypad” and “2.4.8 Using the PHL-7200 keypad” .
- Use the stylus on the touch screen, Refer to “2.4.6 Using the stylus” .
- Select text in the same way you select the text on a PC. Use the stylus to highlight the desired text by dragging the stylus across the desired text, double-tapping to select one word and triple-tapping to select an entire line/paragraph. Refer to “2.4.6 Using the stylus”.
- Use the soft input panel with the stylus. Refer to “2.5.5 The Soft Keypad”
- Use the bar code reader to input the data from a bar code. Press one of the three trigger keys to start the bar code reader. The bar code data will enter in the current application's open window.

For more information on factory installed applications, Refer to Chapter 4 “ **Software Programs**”.

2.5.3 The Command Bar

Use the **Command** bar at top of the screen to perform tasks in programs, such as opening a file, or editing a file.

2.5.4 The Task Bar

The **Task** bar at the bottom of the screen displays the icon, an icon for the active program, the current time, and system icons for utilities loaded in memory. The **Task** bar includes menu names, buttons, and the keyboard icon, which opens and closes the Soft Input Panel (SIP). The **Task** bar allows you to select and close programs. Refer to Figure 2-15 to view the **Task** bar.

Figure 2-18 Task Bar & Command Bar

2.5.5 The Soft Keypad

In applications that accept keypad input, the Soft Input Panel (**SIP**) can be used to enter data using the stylus. The **SIP** is a software, QWERTY-style keyboard.

To open the **SIP**, tap the **keyboard** icon to open the menu and select **Hide Input Panel** to close the keyboard.

Use the stylus to select letters, numbers, or symbols from the **Soft Input Panel** for the current application.

2.5.6 Setting Up Wireless LAN RF

- 1) Press "Start"---"Settings"---"Control Panel" --- "WLAN Manager".
- 2) Launch the WLAN Manager to **Enable** WLAN device.
- 3) Into AP Browser tab, tap Scan button to renew the network.
- 4) Select a network, tap the Join button or double tap it for more options.
- 5) Press OK to save all your WLAN settings.
- 6) Tap the "Exit" button to **Disable** WLAN device.

Figure 2-19 WLAN Manager

Figure 2-20 WLAN Manager

	802.11b WLAN is not connected to a network.
	802.11b WLAN no signal.
	802.11b WLAN signal is Low.
	802.11b WLAN signal is Average.
	802.11b WLAN signal is Good.

Figure 2-21 WLAN Manager

Figure 2-22 WLAN Manager

2.5.7 Reading bar codes, 1D laser version.

To use the scanning function, complete the following steps:

1. If you have not already done so, remove the protective plastic film before using devices equipped with a 1D laser bar code reader.
2. Run the **WordPad** software program.
3. Press one of the three bar code reader trigger buttons.
4. Aim the scanning beam at the center of bar code.

5. Good scanning position.

The reading range is from 50 to 650mm distance.

- 1) Decrease the scanning distance to the bar code when scanning small bar codes.
- 2) Increase the scanning distance from the bar code when scanning large bar codes
- 3) The scanning area is visible by a red laser beam.

6. Bad scanning position.

- 1) Make sure that the laser beam sweeps across whole bar code.
- 2) Scanning operations may fail if the laser beam is positioned as below.

7. Upon reading a bar code, the red LED indicator turns on until the trigger is release or after five seconds. The green LED and the beep tone indicates a good read.

Note: this product scans using laser light. Never look directly into the laser light or shine the laser light into the eyes.

2.5.8 Reading bar codes, 2D CMOS version.

The 2D CMOS version can read both 1D and 2D bar codes. To use the scanning function, complete the following steps:

1. If you have not already done so, remove the protective plastic film before using devices equipped with a 2D CMOS bar code reader.
2. Run the **WordPad** software program.
3. Press one of the three bar code reader trigger buttons.
4. Aim the scanning beam at the center of bar code. To assist in aiming, there are 4 green aiming light spots. The bar code should be between the outside 2 green spots. The scanner is in focus in case the center 2 green spots joins into 1 spot.

5. Good scanning position.

The reading range is from 45 to 260mm distance.

- 4) Decrease the scanning distance to the bar code when scanning small bar codes.
- 5) Increase the scanning distance from the bar code when scanning large bar codes
- 6) The bar code should be located within the green light spots
- 7) The scanning area is visible by a red illumination area.

6. Bad scanning position.

- 1) Make sure that the laser beam sweeps across whole bar code.
- 2) Scanning operations may fail if the illumination beam is positioned as below.

7. Upon reading a bar code, the red LED indicator turns on until the trigger is release or after five seconds. The green LED and the beep tone indicates a good read.

2.5.9 Help

Tap “?” to get information for each program.

2.6 Power management

2.6.1 Suspend Mode

The PDT will go into a suspend mode when it is idle for a period of time. The idle duration can be customized using the **Power** control panel (refer to Figure “**Schemes Tab**”) Suspend mode works and looks just like you have turned the unit off. Press the  key to suspend the PDT, Press the  key again for the PDT to resume its Previous state.

Use the **Battery power** control panel to set the duration to switch state to Suspend mode when system using battery power. This will save battery power when PDT is not in use.

Figure 2-23 **Schemes Tab**

Suspending:

The following conditions will suspend:

- Press <**Power**> key while the unit is on.
- The duration timer of item “Switch **state to Suspend**” expires, which indicates that there has been no user activity for a specified of time.
- The battery pack is almost empty.
- Tap **Start > Suspend**

Figure 2-24 **Suspend**

2.6.2 Resuming

Use the following method to resume (wake up the PDT):

- Press <**Power**> key to suspend or resume (wake up).

When a battery pack completely discharges while the unit is in suspend mode, the PDT remains suspended until discharged battery condition is corrected.

2.7 Resetting the PDT

2.7.1 Warm Reset

A warm reset is a transition from the on, idle, or suspend power state that close all applications, clears the working RAM, but preserves the file system.

Reason to Warm Reset: If an application “hangs”, initiate a warm reset to terminate the application only.

Process to Warm Reset: To warm reset, press “**F1**” and “**F4**” button simultaneously.

After Warm Reset:

- The desktop appears with the application shortcuts on the screen.
- The custom settings in the registry are persistent.

2.7.2 Cold Reset

CAUTION: Try warm reset before you initiate Cold Reset. All applications will be Closed and working RAM and all files will be cleared if you initiate the Cold Reset. It is strongly recommended to back up your files to FlashROM, Flashcard or PC.

- 1) You can use Cold Reset to initialize the PDT if WINCE.NET OS lock up or Warm Reset has no effect.
- 2) To perform Cold Reset, press “**Power**”, “**F1**” and “**F4**” button simultaneously.
- 3) PDT will initiate boot up after Cold Reset.

Chapter 3. PDT settings

3.1 Introduction

To view available options for PDT's setting, tap **Start > Settings**. Then, there are three items inside **Settings**: “**Control Panel**”, “**Network and Dial-up**” and “**Taskbar and Start**”.

3.2 Control Panel

To view the **Control Panel** and settings you can modify by tapping **Start > Settings > Control Panel**.

Figure 3-1 Control Panel

3.2.1 BarCode Settings

ICON	ITEM & FUNCTION
	- Start bar code settings tool : ✓ Enable or disable bar code scanner ✓ Select bar code symbologies ✓ Select prefixes and suffixes ✓ Select quiet zone options ✓ Select read mode options

3.2.1.1 Basic TAB

In the “Basic tab” the bar code reader behavior can be changed.

Figure 3-2 Basic Tab

Field name	Description
Enable bar code reader	Enable or disable the bar code reader. Default is enabled.

Beep After Scan OK	Select the number of beeps after scanning a bar code which is successfully decoded by the bar code reader.	
	None	Disable beep after scanning bar code.
	One Time	Beep one time after scanning bar code (default).
	Two Times	Beep two times after scanning bar code.
Keybd Message	Select the bar code data transfer method	
	Disable	Data from bar code reader is ignored.
	Type Writing	Data from bar code reader is send as keyboard data to the application which currently has the focus (default).
Read mode	Select the bar code reading mode.	
	Single read	When a bar code has been decoded, the reader will be turned OFF. The reader must be triggered again to read another bar code (default).
	Multiple read	When a bar code has been decoded, the reader will stay ON for the time as set by 'Read time' options. The same bar code can only be decoded again after the label has not been detected for a number of scans.
Read time	The length of the period that the reader is ON after the trigger switch is pressed, or (in multiple read mode), after a label has been read.	
	0 sec	Reader will stay on as long as the trigger switch is being pressed.
	1 sec	1 second
	2 sec	2 seconds (default)
