Specification parameters

Product model	BHD-TW7
ETC ID	00000000000000000000
Dimensions	52-62 (L) 35 (W) 22 (H) (mm)
Weight	Approx. 15g (1 pair)
Battery type	Rechargeable lithium-ion battery
Charging time	1-2 h
Battery capacity of earbuds	20mAh
Battery capacity of charging case	200mAh
Rated voltage	3.7V
Frequency	2400-2483.5MHz
Charging time	Approx. 1-2 h
Protection	Approx. IPX5
Endurance of single earbud	Approx. 5h (50% volume)
Operation range	>100m
Support protocols	AAC/BT / HSP/EDR / AVRCP / A2DP
Accessories	Earbuds (1 pair) Charging case (1) User manual (1)

The stated data is measured from the PISEN Laboratory, while actual performance may vary with product or data factors.

6. The output voltage and current of charger should not exceed 5V 1A. If their specifications are exceeded, the product will be seriously damaged and the warranty will be voided.

FCC Warning:

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including that from unlicensed operations.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC ID: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential environment. The equipment generates noise and radio frequency interference, and it may not interfere and may be susceptible to the radio frequency, and cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- The device has been evaluated to meet general RF exposure requirements. The device can be used in portable operation condition without restriction.
