RE: FCC ID: APYNAR0058\_ATCB001885  
Attention: Yukari Ito

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the plot of the band edge compliance on page 20 (1850MHz) and the band edge plot on page 21 (1910) appear to be non-compliant as portions of the emissions shown are over the projected limit line in the plot. Please explain and please verify that the conducted plot data is at the required -13dBm limit.
2. Please note that the max SAR value in the manual (0.452w/kg) does not match that recorded in the SAR report (1.42w/kg). Please explain and please provide consistent data in the appropriate documentation. Please correct documents as needed.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
