## **SECTION 1**

### **REPORT SUMMARY**

RF Exposure Assessment of the  
Nokia  
Flexi Zone Micro Base Station

Product Service

## 1.1 INTRODUCTION

The information contained in this report is intended to show verification of the RF Exposure Assessment of the Nokia Flexi Zone Micro Base Station to the requirements of the applied test specifications.

|                               |                                                                                                                    |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------|
| Objective                     | To perform RF Exposure Assessment to determine the Equipment Under Test's (EUT's) compliance of the applied rules. |
| Applicant                     | Nokia                                                                                                              |
| Manufacturer                  | Nokia                                                                                                              |
| Manufacturing Description     | Base Station                                                                                                       |
| Model Number(s)               | Flexi Zone Micro                                                                                                   |
| Test Specification/Issue/Date | EN 62311:2008<br>CFR 47 Pt1.1310<br>Health Canada Safety Code 6<br>ARPANSA Radiation Protection Series No.3        |

## 1.2 REGIONAL REQUIREMENTS

The table below shows the regional requirements that are referenced in this test report. A full list of the requirements is shown in Annex A.

| Report Reference | Regional Requirement                     |
|------------------|------------------------------------------|
| EU               | EN 62311:2008                            |
| FCC              | CFR 47 Pt1.1310                          |
| IC               | Health Canada Safety Code 6              |
| AUS              | ARPANSA Radiation Protection Series No.3 |

## 1.3 PRODUCT INFORMATION

### 1.3.1 Technical Description

The Equipment under test was a Nokia Flexi Zone Micro Base Station. A full technical description can be found in the manufacturer's documentation.

All reported calculations were carried out on the relevant information supplied for the Flexi Zone Micro Base Station to demonstrate compliance with the applied test specification(s). The sample assessed was found to comply with the requirements of the applied rules.

### 1.3.2 Supported Features

The following radio access technologies and frequency bands are supported by the equipment under test.

|                         |                                                |
|-------------------------|------------------------------------------------|
| Radio Access Technology | LTE TDD<br>Bluetooth                           |
| Frequency Band          | Band 41: 2496 - 2690<br>Bluetooth: 2400 - 2480 |

### 1.3.3 Antennas

The following antennas are supported by the equipment under test.

| No. | Model                 | Gain (dBi) |
|-----|-----------------------|------------|
| 1   | PCTEL MHO80617102NM   | 2          |
| 2   | PCTEL MHO242703NM     | 2          |
| 3   | Laird WXC2400SMRP-NS1 | 0          |

Product Service

#### 1.3.4 EUT Configurations

The EUT has two configurations as shown in the table below

| Configuration        | Antenna Port | RAT       |
|----------------------|--------------|-----------|
| Omni Configuration 1 | 1            | LTE       |
|                      | 2            | LTE       |
|                      | 3            | Bluetooth |
| Omni Configuration 2 | 1            | LTE       |
|                      | 2            | LTE       |
|                      | 3            | Bluetooth |

Omni Configuration 1 and 2

Product Service

#### 1.4 BRIEF SUMMARY OF RESULTS

The wireless device described within this report has been shown to be capable of compliance with the basic restrictions related to human exposure to electromagnetic fields for both General Public and Occupational. The calculations shown in this report were made in accordance the procedures specified in the applied test specification(s).

| Configuration                         | Required Compliance Boundary (m) |                    |
|---------------------------------------|----------------------------------|--------------------|
|                                       | Occupational                     | General Population |
| LTE TDD Band 41 Single Carrier        | 0.20                             | 0.44               |
| LTE TDD Band 41 2 Carrier + Bluetooth | 0.36                             | 0.88               |
| Bluetooth                             | 0.02                             | 0.04               |

**Table 1 – Compliance Boundary Results**

Product Service

#### 1.4.1 Configuration 1 - LTE TDD Band 41

| Regional Requirement | Calculated RF exposure level at compliance boundary of 0.20 m |         |               |          |               |        |
|----------------------|---------------------------------------------------------------|---------|---------------|----------|---------------|--------|
|                      | S Field (W/m <sup>2</sup> )                                   |         | E Field (V/m) |          | H Field (A/m) |        |
|                      | Result                                                        | Limit   | Result        | Limit    | Result        | Limit  |
| EU                   | 23.7040                                                       | 50.0000 | 133.6877      | 137.0000 | 0.3546        | 0.3630 |
| FCC*                 | 2.3704                                                        | 5.0000  | N/A           | N/A      | N/A           | N/A    |
| IC                   | 23.7040                                                       | 50.0000 | 133.6877      | 137.0000 | 0.3546        | 0.3640 |
| AUS                  | 23.7040                                                       | 50.0000 | 133.6877      | 137.0000 | 0.3546        | 0.3640 |

\* Requirement and Result in mW/cm<sup>2</sup>

**Table 2 – Occupational Results**

The calculations show that the EUT complies with the occupational exposure levels described in the EN 62311:2008, CFR 47 Pt1.1310, Health Canada Safety Code 6 and ARPANSA Radiation Protection Series No.3 at the point of investigation, 0.20 m.

| Regional Requirement | Calculated RF exposure level at compliance boundary of 0.44 m |         |               |         |               |        |
|----------------------|---------------------------------------------------------------|---------|---------------|---------|---------------|--------|
|                      | S Field (W/m <sup>2</sup> )                                   |         | E Field (V/m) |         | H Field (A/m) |        |
|                      | Result                                                        | Limit   | Result        | Limit   | Result        | Limit  |
| EU                   | 4.8975                                                        | 10.0000 | 60.7671       | 61.0000 | 0.1612        | 0.1620 |
| FCC*                 | 0.4898                                                        | 1.0000  | N/A           | N/A     | N/A           | N/A    |
| IC                   | 4.8975                                                        | 10.0000 | 60.7671       | 61.4000 | 0.1612        | 0.1630 |
| AUS                  | 4.8975                                                        | 10.0000 | 60.7671       | 61.4000 | 0.1612        | 0.1630 |

\* Requirement and Result in mW/cm<sup>2</sup>

**Table 3 – General Population Results**

The calculations show that the EUT complies with the occupational exposure levels described in the EN 62311:2008, CFR 47 Pt1.1310, Health Canada Safety Code 6 and ARPANSA Radiation Protection Series No.3 at the point of investigation, 0.44 m.

Product Service

#### 1.4.2 Configuration 2 - LTE TDD Band 41 + Bluetooth

The tables below show the summed fractional results from the antenna port summary in section 2.2. Where the result is less than one, the EUT is deemed compliant.

| Regional Requirement | Calculated RF exposure level at compliance boundary of 0.36 m as a Fraction of the Limit |         |         |
|----------------------|------------------------------------------------------------------------------------------|---------|---------|
|                      | S Field                                                                                  | E Field | H Field |
| EU                   | 0.1479                                                                                   | 0.8027  | 0.8036  |
| FCC                  | 0.1479                                                                                   | N/A     | N/A     |
| IC                   | 0.2293                                                                                   | 0.9977  | 0.9977  |
| AUS                  | 0.1479                                                                                   | 0.8027  | 0.8014  |

**Table 4 – Occupational Results**

The calculations show that the EUT complies with the occupational exposure levels described in the EN 62311:2008, CFR 47 Pt1.1310, Health Canada Safety Code 6 and ARPANSA Radiation Protection Series No.3 at the point of investigation, 0.36 m.

| Regional Requirement | Calculated RF exposure level at compliance boundary of 0.88 m as a Fraction of the Limit |         |         |
|----------------------|------------------------------------------------------------------------------------------|---------|---------|
|                      | S Field                                                                                  | E Field | H Field |
| EU                   | 0.1238                                                                                   | 0.7375  | 0.7366  |
| FCC                  | 0.1238                                                                                   | N/A     | N/A     |
| IC                   | 0.2253                                                                                   | 0.9892  | 0.9891  |
| AUS                  | 0.1238                                                                                   | 0.7327  | 0.7321  |

**Table 5 – General Population Results**

The calculations show that the EUT complies with the general population exposure levels described in the EN 62311:2008, CFR 47 Pt1.1310, Health Canada Safety Code 6 and ARPANSA Radiation Protection Series No.3 at the point of investigation, 0.88 m.

## 2.1 RATIONALE FOR ASSESSMENT OF THE RF EXPOSURE

The aim of the assessment report is to evaluate the compliance boundary for a set of given input power(s) according to the basic restrictions (directly or indirectly via compliance with reference levels) related to human exposure to radio frequency electromagnetic fields.

The chosen assessment method to establish the compliance boundary in the far-field region is the reference method as defined in the relevant specifications.

The RF exposure assessment is based upon the following criteria:

The Flexi Zone Micro Base Station operates with the following transmitters active on the antenna ports shown in Section 1.3.3. For each transmitter, the Radio Access Technology (RAT), EIRP inclusive of antenna gain and duty cycle, gain of the antenna and lowest frequency of operation are shown as they contribute to the calculation of S Field, E field and H field values according to the following formulas.

The power flux (S Field):

$$S = \frac{PG_{(\theta, \phi)}}{4\pi r^2}$$

The electric field strength (E Field):

$$E = \frac{\sqrt{30PG}}{r} G_{(\theta, \phi)}$$

The magnetic field strength (H Field):

$$H = \frac{E}{\eta_o}$$

Where:

P = Average Power (W)

G = Antenna Gain (dBi)

r = Distance (cm) or (m)

$\eta_o = 377$

Product Service

## 2.2.4 Configuration 1 - LTE TDD Band 41

The following tables show a summary of each antenna port and the summation of the RF exposure results and limit for each region.

| Antenna Port | EIRP (W) | Regional Requirement | Calculated RF exposure level at compliance boundary of 0.20 m |         |               |          |               |        |
|--------------|----------|----------------------|---------------------------------------------------------------|---------|---------------|----------|---------------|--------|
|              |          |                      | S Field (W/m <sup>2</sup> )                                   |         | E Field (V/m) |          | H Field (A/m) |        |
|              |          |                      | Result                                                        | Limit   | Result        | Limit    | Result        | Limit  |
| 1            | 5.957    | EU                   | 11.8520                                                       | 50.0000 | 66.8438       | 137.0000 | 0.1773        | 0.3630 |
|              |          | FCC*                 | 1.1852                                                        | 5.0000  | N/A           | N/A      | N/A           | N/A    |

Table 19 – General Population Antenna Port Summary

Product Service

## 2.2.5 Configuration 2 - LTE TDD Band 41 + Bluetooth

As the frequency of operation for each transmitter is not the same, in order to evaluate compliance with the limit which is dependent on frequency, the calculated RF exposure fields are divided by the limit to get a fractional exposure value. Any values less than one are compliant with the limit. Table 2 shows a summary of each antenna port and the summation of the fractional RF exposure results of each transmitter.

| Antenn a Port | EIRP (W) | Regional Requirement | Calculated RF exposure level at compliance boundary of 0.36 m as a Fraction of the Limit |         |         |
|---------------|----------|----------------------|------------------------------------------------------------------------------------------|---------|---------|
|               |          |                      | S Field                                                                                  | E Field | H Field |
| 1             | 5.972    | EU                   | 0.0733                                                                                   | 0.3838  | 0.3842  |
