Gentlemen:

The enclosed documents constitute a formal submittal and request for a Class II Permissive Change pursuant to Subpart C of Part 15 of FCC Rules (CFR 47) regarding changes to intentional radiators. A change is being proposed to the Dell Corporation model PP04S system, which would result in changes to the performance characteristics originally reported to the Commission. These changes are detailed on page 9 of the report and test data.

Since the PP04S system is presently certified, an emissions test has been performed to demonstrate that it continues to comply with FCC Part 15 limits for intentional radiators.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

A handwritten signature in black ink that reads "Mark Briggs". The signature is written in a cursive, flowing style.

Mark Briggs
Director of Engineering
