Subject: Class II Permissive Change for Class B Computing Device Peripheral  
FCC ID: A3KM081 / Monitor, Model 104S11 Series

Gentlemen:

Enclosed, please find Philips Electronics Industries (Taiwan) Ltd.'s application for equipment authorization, dated March 3, 2000. The subject device was originally granted on March 2, 1998 in compliance with Part 15 Subpart B of the FCC Rules.

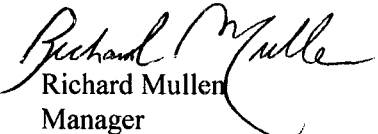

This device was reported as 14" Digital Autoscans Color Monitor that can support 30-60 kHz horizontal and 47-125 Hz vertical sync frequencies with maximum resolutions up to 1024x768, Non-Interlaced. Also, this monitor was reported as provided with: (1) detachable non-shielded power supply cord; (2) permanently attached shielded 15-Pin D-Sub connector signal cable with one or two external bonded ferrite cores; and (3) employs video IC type TDA4885 or type TDA4886.

This Class II Change is to report: (1) change sync frequencies to 30-54 kHz horizontal and 56-120 kHz with same maximum resolutions up to 1024x768, Non-Interlaced (2) new cabinet style; (3) alternate type CRT with same resolution; (4) use one external ferrite core on shielded 15-Pin D-Sub connector signal cable; (5) change video board layout and change video IC to type TDA4853; and (6) change layout of main chassis printed wiring board.

The revised monitor was system tested in accordance with C63.4-1992 to show compliance to FCC Part 15 limits. Compliance tests were performed in two representative worst-case video modes 800x600 @ 53.7 kHz and 1024x768 @ 48.3 kHz.

Should you have any questions or comments, please contact the undersigned who is an authorized agent for the subject application. Thank you for your attention and cooperation in this matter.

Sincerely yours,

  
Richard Mullen
