To whom it may concern

21st September 2006

Dear Sir or Madam,

**Re: FCC Type Approval of McMurdo G5 SMARTFIND PLUS, SIMRAD EG50
and SAILOR SGE406-II EPIRB's.**

With reference to the application made by McMurdo Ltd to FCC for the type approval of the McMurdo G5 SMARTFIND PLUS and SIMRAD and SAILOR EPIRB variants, e.g. Ref: FCC ID:KLSKLS-G5-1, First Confirmation Number:EA399587 dated 21st September 2006, I would like to notify the FCC of the following errors made during the Electronic Filing Option:-

- a. The FCC ID was loaded incorrectly and should read FCC ID: KLS-G5-1 and not KLSKLS-G5-1, as referenced on the record sheets. Please amend to KLS-G5-1 against Confirmation number: EA399587, as the product will have this number included in the labelling, when approved and also so we can use the same number for checking the approval progress against the OET Pending Application Status.
- b. The Parts List Exhibited should have been made Confidential, as it contains proprietary information not for issue to any third party. The Parts List Exhibited was repeated under cover of the Standard Confidentiality, but please delete the first entry, where no Confidentiality was stated.
- c. The G5 FCC Application letter exhibited under Covering Letter had the incorrect date; it should have read 20th September 2006.

Sorry for any inconvenience caused, should there be any queries or require additional supporting type approval information, please do not hesitate to contact the undersigned.

Yours faithfully

Derek Carr
