Re: Supersede request for FCC ID: **2AQ68RPQN7801**; Granted on **12/08/2021**

To Whom It May Concern:

We regret to inform you that due to a typo for the unit of the power in test reports, we would like to request supersede of the following documents to prevent misunderstanding to the public:

Exhibit Type	Original Exhibit Name	New Exhibit Name	Page(s) Modified
Test Report	RF Exposure Info (MPE)	RF Exposure Info (MPE) rev2	Page 5
Test Report	Test Report (Part 27)-1 rev	Test Report (Part 27)-1 rev3	Page 13

The output power reported in the original test reports was mistakenly labeled as “dBm/MHz”, when they in fact represented total channel power “dBm/100MHz”.

We have corrected the units for the reported power so that it is clear how the device complies with the applicable regulatory limit of 1640W/MHz EIRP.

If you have any questions, feel free to contact us. Thank you.

Sincerely yours,

Jamison Chan/ Senior Manager
