Object: Permissive Change Request

We, BCF Technology Ltd, request a permissive change to the Duo-Scan:Go and Duo-Scan:Go Plus FCC Part 18 grants.

Description of permissive change:

The current Part 18 grant of equipment authorization states frequency range 110 KHz-205 KHz.

A modification to the Part 18 grant is required to state limited operation of the scanner between 110kHz-190kHz.

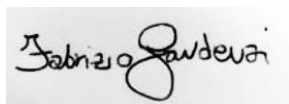

The original test data is still valid as the scanner was tested with a charger that works over the frequency range of 110kHz-190kHz

Products affected

Duo-Scan:Go, FCC ID: 2AL6R-DSGC01

Duo-Scan:Go Plus, FCC ID: 2AL6R-DSGC02

Best regards

Fabrizio Gaudenzi

Lead Design Engineer at BCF Technology Ltd
