

What the lighted symbols mean

Flashing orange: the bridge is looking for a cellular signal; if the flashing continues more than 2 minutes, try moving it closer to a window.

Solid white: the device is connected and ready to sync.

Flashing white: sync in progress.

Solid white: sync done.

If the error light is solid orange, unplug the device and then plug it back in. If that doesn't work, give us a call: 1-XXX XXX XXXX.

Note: After 5 minutes of inactivity, all the lighted symbols will go dark.

Charge and sync your Study Kit device with the bridge

Sync: to sync your Study Kit device with the connectivity bridge, plug the device into the bridge with the USB cord that came in your Study Kit box. The sync will happen automatically.

Charge: you can use the bridge to charge your Study Kit device. The bridge has 5 volts (700 milliamps) of power.

Open source software

The connectivity bridge uses open source software. To learn more about this software, or to review the licenses, please visit support.google.com/studykit.

International restrictions

Device is currently authorized for use in the United States. You are responsible for complying with all applicable laws, including with limitation export and import laws and regulations.

U.S. regulatory notices

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly authorized by the manufacturer express approval could void the user's authority to operate the device.

Connectivity Bridge Quick Start Guide

Study Kit

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Radiation Exposure Statement:

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.
