### Test Method

#### **Measurement Standard**

- To fix device on the turntable, and laser positioning the height level in the center of the probe.
- · Align the chamber coordinate and UI coordinate.
- Sampling the antenna pattern according to Phi increment 5º / Theta increment 5º.
- Finished 3D data collection along with Theta-175°~Theta175° and Phi0°~Phi180°
- Frequency resolution setup depends on the different bands.
