## **Declaration Letter of modifications of certified product**

**Dear Sir/Madam,**

**This file will present the difference between the originally tested HS6 sensor and the sensor variants sent for certification.**

**The product would like to modify the authorized equipment for below changes:**

- 1. non RF board PCB component change**
- 2. Housing changes**

**Except for the changes above, no other modification is performed. There is no hardware or electrical modification made to the applying transmitter itself and no modification made to the RF board of the product.**

**Details of the differences are shown below:**

HS6\_HENRYK - original (2BALY-HS6)

**BOM**

**PCB component placement**

## **Variant Test Sample 2 --- HS6\_OLAF\_BIN\_RS**

HS6\_OLAF\_BIN\_RS - Compared with HS6\_HENRYK,

**BOM component changes:**

**Housing changes:** There is a hole in the housing through which the connected reed switch passes. The sensor measures the change in the state of the reed switch (short/open). The sensor indicates a change from OK to ALARM

**EFENTO SP. Z O.O.***Add: Ul.Krupnicza 14/5 31-123 Kraków, POLAND**Tel: 48609823465 Fax: 48609823465***BOM comparison:**
