Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>This device is tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. This device can radiate radio frequency energy and, if not properly installed and used, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference, you may need to take certain corrective actions. The following measures should be taken by you or your authorized service technician to correct the interference: (1) Reconnect the equipment into an outlet on a circuit different from that to which the receiver is connected. (2) Move the equipment away from the receiver. (3) Consult the equipment's user manual for additional information. (4) Consult your service technician for help.</p> <p>MODIFICATION: Any changes or modifications not approved by the manufacturer may void the user's authority to operate the device.</p>
