

Samsung Electronics Co., Ltd. 129,  
Samsung-ro, Yeongtong-gu  
Suwon-City, Gyeonggi-do,  
16677, Korea

**Date: Oct. 30, 2024**

To Whom it May Concern

**Subject: WLAN 6 GHz Attestation Letter for Dual Client device**  
**FCC ID: A3LSMS931B**

We attest the following:

1. This device receives the associated client/subordinate of its permitted maximum power correctly.
2. This device will only associate and connect with a low power indoor AP, subordinate device, or standard access point and never directly link to any other client devices.
3. This device will always initiate transmission under the control of an indoor access point or subordinate device or standard power access point except for brief communications before joining network. These quick messages will only occur if the client has detected an indoor AP, subordinate, or standard access point operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP, it will not continually repeat the request.
4. This device , when associated and connected with a low power indoor access point, subordinate or standard access point device, will operate at a power as advertised by the low power indoor access point, subordinate or standard access point:
  - a. Lower than or equal to the power advertised by the low power indoor access point or subordinate and never above the maximum output power allowed by the FCC grant for clients associated with indoor clients or subordinates.
  - b. Lower than 6 dB below the power advertised by the standard access point.

Transmissions will be lower or equal to the power advertised by the indoor low-power access point and never above the maximum output power allowed by the FCC grant.

5. This device is prohibited for control of or communications with unmanned aircraft systems, including drones.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

Jenni Chun / General Manager
