

## RF Exposure Report

**Report No.:** MFBCUG-WTW-P22010682B

**FCC ID:** B32UX7002

**Model No.:** UX700-WBU-2

**Received Date:** 2022/11/11

**Test Date:** 2022/11/17 ~ 2023/02/7

**Issued Date:** 2023/2/10

**Applicant:** Verifone, Inc.

**Address:** 1400 West Stanford Ranch Road Suite 150 Rocklin CA 95765 USA

**Issued By:** Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch  
Lin Kou Laboratories

**Lab Address:** No. 47-2, 14th Ling, Chia Pau Vil., Lin Kou Dist., New Taipei City, Taiwan

**Test Location:** No. 19, Hwa Ya 2nd Rd., Wen Hwa Vil., Kwei Shan Dist., Taoyuan City  
33383, TAIWAN

**FCC Registration /** 788550 / TW0003  
**Designation Number:**

This report is governed by, and incorporates by reference, the Conditions of Testing as posted at the date of issuance of this report at <http://www.bureauveritas.com/home/about-us/our-business/cps/about-us/terms-conditions/> and is intended for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. Measurement uncertainty is only provided upon request for accredited tests. Statements of conformity are based on simple acceptance criteria without taking measurement uncertainty into account, unless otherwise requested in writing. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence or if you require measurement uncertainty; provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents.

## Table of Contents

| 2.3 Classification .....                                     | 5        |
| <b>3 Calculation Result of Maximum Conducted Power</b> ..... | <b>6</b> |

### Release Control Record

| Issue No.             | Description      | Date Issued |
|-----------------------|------------------|-------------|
| MFBCUG-WTW-P22010682B | Original release | 2023/2/10   |

## 1 Certificate of Conformity

**Product:** Point of Sale Terminal

**Brand:** Verifone

**Model No.:** UX700-WBU-2

**Sample Status:** Engineering sample

**Applicant:** Verifone, Inc.

**Test Date:** 2022/11/17 ~ 2023/02/7

**FCC Rule Part:** FCC Part 2 (Section 2.1091)

**Standards:** KDB 447498 D01 General RF Exposure Guidance v06

The above equipment has been tested by **Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch**, and found compliance with the requirement of the above standards. The test record, data evaluation & Equipment Under Test (EUT) configurations represented herein are true and accurate accounts of the measurements of the sample's RF characteristics under the conditions specified in this report.

**Prepared by :** Celine Chou , **Date:** 2023/2/10  
Celine Chou / Senior Specialist

**Approved by :** Jeremy Lin , **Date:** 2023/2/10  
Jeremy Lin / Project Engineer

## 2 RF Exposure

### 2.1 Limits for Maximum Permissible Exposure (MPE)

| Frequency Range (MHz)                                 | Electric Field Strength (V/m) | Magnetic Field Strength (A/m) | Power Density (mW/cm <sup>2</sup> ) | Average Time (minutes) |
|-------------------------------------------------------|-------------------------------|-------------------------------|-------------------------------------|------------------------|
| Limits For General Population / Uncontrolled Exposure |                               |                               |                                     |                        |
| 300-1500                                              | ...                           | ...                           | F/1500                              | 30                     |
| 1500-100,000                                          | ...                           | ...                           | 1.0                                 | 30                     |

F = Frequency in MHz

### 2.2 MPE Calculation Formula

$$P_d = (P_{out} * G) / (4 * \pi * r^2)$$

where

$P_d$  = power density in mW/cm<sup>2</sup>

$P_{out}$  = output power to antenna in mW

G = gain of antenna in linear scale

$\pi$  = 3.1416

r = distance between observation point and center of the radiator in cm

### 2.3 Classification

The antenna of this product, under normal use condition, is at least 20cm away from the body of the user. So, this device is classified as **Mobile Device**.

### 3 Calculation Result of Maximum Conducted Power

| Function      | Frequency Band (MHz) | Max AV Power (dBm) | Antenna Gain (dBi) | Distance (cm) | Power Density (mW/cm <sup>2</sup> ) | Limit (mW/cm <sup>2</sup> ) |
|---------------|----------------------|--------------------|--------------------|---------------|-------------------------------------|-----------------------------|
| WLAN          | 2412-2462            | 16.65              | 2.60               | 20            | 0.017                               | 1.000                       |
|               | 5180-5240            | 16.55              | 3.60               | 20            | 0.021                               | 1.000                       |
|               | 5260-5320            | 16.51              | 3.60               | 20            | 0.020                               | 1.000                       |
|               | 5500-5700            | 16.31              | 3.60               | 20            | 0.019                               | 1.000                       |
|               | 5745-5825            | 14.85              | 3.60               | 20            | 0.014                               | 1.000                       |
| Bluetooth LE  | 2402-2480            | 1.63               | 2.60               | 20            | 0.001                               | 1.000                       |
| Bluetooth EDR | 2402-2480            | 10.51              | 2.60               | 20            | 0.004                               | 1.000                       |

Note:

1. Determining compliance based on the results of the compliance measurement, not taking into account measurement instrumentation uncertainty.
2. The above Antenna information is declared by manufacturer and for more detailed features description, please refer to the manufacturer's specifications, the laboratory shall not be held responsible.

| Mode | Field Strength (dBuV/m) @30m | Field Strength (dBuV/m) @3m | Max. Power EIRP (dBm) | Distance (cm) | Power Density (mW/cm <sup>2</sup> ) | Limit (mW/cm <sup>2</sup> ) |
|------|------------------------------|-----------------------------|-----------------------|---------------|-------------------------------------|-----------------------------|
| NFC  | 44.50                        | 84.50                       | -10.73                | 20            | 0.000017                            | 0.978                       |

Note:

1. Determining compliance based on the results of the compliance measurement, not taking into account measurement instrumentation uncertainty.
2. Max Power (dBm) = Field Strength of Fundamental (dBuV/m@3m) – 95.23,  
Max Power (mW) =  $10^{(\text{Max power (dBm)}/10)}$
3. The measured field strength was extrapolated to distance 30 meters, using the formula that the limit of field strength varies as the inverse distance square (40dB per decade of distance)

| Mode | Max. Power EIRP (dBm) @1m | Max. Power EIRP (dBm) @3m | Distance (cm) | Power Density (mW/cm <sup>2</sup> ) | Limit (mW/cm <sup>2</sup> ) |
|------|---------------------------|---------------------------|---------------|-------------------------------------|-----------------------------|
| UWB  | -12.58                    | -22.12                    | 20            | 0.000001                            | 1.000                       |

Note:

1. Determining compliance based on the results of the compliance measurement, not taking into account measurement instrumentation uncertainty.
2. Test distance at 1m, 1m to 3m Test distance Fact(dB)= $20 \cdot \log(1/3) = -9.54\text{dB}$ .

#### Conclusion:

The formula of calculated the MPE is:

$\text{CPD1} / \text{LPD1} + \text{CPD2} / \text{LPD2} + \dots \text{etc.} < 1$

CPD = Calculation power density

LPD = Limit of power density

$2.4\text{GHz} + \text{BT} = 0.017 / 1 + 0.004 / 1 = 0.021 < 1$

$5\text{GHz} + \text{BT} = 0.021 / 1 + 0.004 / 1 = 0.025 < 1$

---END---
