

Solder Board-Component View 4	 A photograph showing a green printed circuit board (PCB) component with a large, rectangular, copper-colored solder mask. The component is positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 0 to 100 mm. The component's width is approximately 40 mm, and its height is approximately 30 mm.
Solder Board-Component View 5	 A photograph showing a green printed circuit board (PCB) component with various electronic components, including a large black integrated circuit (IC) and several smaller components. The component is positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 0 to 100 mm. The component's width is approximately 40 mm, and its height is approximately 30 mm.

Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) component, likely a baseband or antenna module, resting on a blue textured surface. The board is populated with various electronic components, including a large black integrated circuit (IC) labeled 'SPREADTRON', a smaller IC labeled 'ISOCOM', and several surface-mount components. A yellow connector is visible on the left side. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (mm) from 0 to 100.
Antenna View	 A photograph showing the back of a black smartphone with its battery cover removed, revealing the internal antenna layout. The phone is placed on a blue textured surface next to a black ruler with white markings. Two red rectangular boxes highlight specific antenna locations: one at the top right labeled 'GPS/WIFI/BT Ant' and another at the bottom center labeled 'GSM/WCDMA Ant.'. The battery cover has the 'BLU smartphones' logo printed on it.
