

# MEMORANDUM FOR CONSIDERATION

TO: FCC REVIEWING ENGINEER

FROM: JIM HAYNES

SUBJECT: FREQUENCY RANGES AND CELLULAR WARNING LABEL

FCC ID: AAO20-195

---

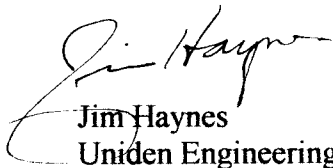

Please note that the Frequency Range(s) entered under the Equipment Specifications are duplicates of the original application submission. However, in reviewing a copy of the Grant of Equipment Authorization (issued June 19, 1998) it appears that the frequencies below 30 MHz were omitted from the Grant. Possibly, this was deleted from the original grant due to the fact that the frequencies between 26.065 MHz and 30 MHz were considered to be outside the scope of this type of Equipment Authorization.

Also, some of the frequencies on the Grant appear to be "rounded" or otherwise changed when comparing to those originally submitted. Therefore, when comparing the Frequency Range(s) of this application against the FCC's database, they may not completely agree.

Additionally, the Cellular Modification Warning Label mandated pursuant to new Part 15.121(f)(1) is not an "ID Label" but we could not find a more suitable exhibit heading to upload this drawing. Therefore, the label is being uploaded under the Exhibit Type as an "ID Label & Location Info".

Please contact the undersigned if you need any further clarification on this matter.

Regards,
