Model: GM862-QUAD / GM862-QUAD-PY Modular Transmitter

SECTION 1

GENERAL INFORMATION

Report Number: 06-0011

Issue Date: April 18, 2006

Customer: Sicom test s.r.l.

Model: GM862-QUAD / GM862-QUAD-PY Modular Transmitter

GENERAL INFORMATION

1.1 Product Description

The Equipment Under Test is the Telit. GM862-QUAD Quad Band GSM-GPRS Data Terminal Module. The EUT is a small, lightweight and low power consumption device. Powered at 3.7 volts and socket mounted. Can be supplied with onboard memory from 4 to 8 MB. A commercial version of the device, named GM862-QUAD-PY, is supplied with 8 MB of memory and the python interpreter installed.

Report Number: 06-0011

Issue Date: April 18, 2006

Customer: Sicom test s.r.l.

Model: GM862-QUAD / GM862-QUAD-PY Modular Transmitter

1.2 Related Submittal(s)/Grant(s)

The EUT is subject to the following authorizations:

- a) Certification as a transceiver as specified by Part 24E and Part 22H.

The information contained in this report is presented for the Part 24E and Part 22H Certification authorization(s) for the EUT.

Report Number: 06-0011

Issue Date: April 18, 2006

Customer: Sicom test s.r.l.

Model: GM862-QUAD / GM862-QUAD-PY Modular Transmitter

SECTION 2

TEST AND MEASUREMENTS

Report Number: 06-0011

Issue Date: April 18, 2006

Customer: Sicom test s.r.l.

Model: GM862-QUAD / GM862-QUAD-PY Modular Transmitter

TEST AND MEASUREMENTS

2.1 Configuration of Tested System

Prepared in accordance with the requirements of the FCC Rules and Regulations Part 2, 22 & 24. All measurements are peak unless stated otherwise. The video filter associated with the spectrum analyzer was off throughout the evaluation process. Interconnecting cables were manipulated as necessary to maximize emissions. A block diagram of the tested system is shown in Figure 1. Test configuration photographs for spurious emissions are shown in Figure 2.

The sample used for testing was received by U.S. Technologies on February 13, 2006 and March 14, 2006 in good condition.

2.2 Test Facility

Testing was performed at US Tech's measurement facility at 3505 Francis Circle, Alpharetta, GA. This site has been fully described and registered by the FCC under Registration Number 91037. Additionally, this site has also been fully described and submitted to Industry Canada (IC), and has been approved under file IC2982.

2.3 Test Equipment

Table 2 describes test equipment used to evaluate this product.

2.4 Modifications

No modifications were made by US Tech to bring the EUT into compliance with FCC Part 24E and Part 22H limits for the transmitter portion of the EUT.
