RE: FCC ID: MXF-C921217G_ATCB001576

Attention: Stephanie Hung

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that other than the model number and gain of the antennae there does not seem to be any difference in the SAR reports from the original and this PC2. Please note that the original antenna has a gain of 0dBi and this PC2 antenna has a gain of 2.2 dBi. Please note that with such a difference it would be expected that the SAR values would be different. Please note the SAR values reported in the tables in the SAR report show no difference. Please explain why the 0dBi antenna and the 2.2dBi antenna appear to show the same SAR values. Please retest the SAR to provide SAR results for the 2.2 dBi antenna if necessary.
