

FCC ID:FSUGG0005

Description of Operation

The EUT is a mobile handheld transmitter of Wireless G-12X. It is using frequency of 27.045Mhz.

The power Supply comes from a AAA type battery, generating 3V DC.

The RF signal can be demodulated by chip MC3361/SL5018. The demodulated baseband digital signal can be processed by IC CY7C63723-SC and sent to the computer through the USB interface for data communication.
