Dear Greg,

Please find my reply as below,

1. The Cover Letters appear to indicate that the EUT includes two certified modules: FCC ID: N7NEM7455 and FCC ID: PD98260NG, however, the User's Manual lists, on p.3, an additional (potential) NFC module. Please clarify if the EUT may also include FCC ID: MCLT77H747, or if the EUT (in this specific application) only incorporates the first two modules listed above (and please see the next comment).

[Sporton] The MCLT77H747 (NFC) is optional module that only available in other variant models. For the EUT in this specific application, the NFC modules is not incorporated.
