

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. The components, including a black plastic housing, a small circuit board, and a yellow capacitor, are laid out on a blue textured surface. A black ruler with white markings is placed vertically and horizontally for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
Solder Board-Component View 1	 A close-up photograph of a small circuit board component. The component is placed on a blue textured surface. A black ruler with white markings is placed vertically and horizontally for scale. The vertical ruler shows markings from 0 to 70 mm, and the horizontal ruler shows markings from 0 to 40 mm.

Solder Board-Component View 2	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is positioned near a corner of the board. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, 70, and 80 mm. The component itself is small and rectangular with various pins and markings.
Solder Board-Component View 3	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is positioned near a corner of the board. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler has markings for 10, 20, 30, 40, 50, 60, 70, and 80 mm. The component is small and rectangular with various pins and markings.

Solder Board-Component View 4	 A photograph showing a yellow cylindrical component, likely a battery, soldered onto a blue printed circuit board (PCB). The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component is connected to two thin wires, one red and one black, which extend from the right side of the component.
Antenna View	 A photograph showing a blue printed circuit board (PCB) with a black ruler placed next to it for scale. A red box highlights a specific component on the PCB, labeled "BT Antenna". The component is a small, rectangular, black integrated circuit (IC) with several pins. The ruler shows measurements in millimeters (mm) and centimeters (cm).
