### ⚠ Notes:

If you are using a case that is too thick (>4mm) or a case with an airbag holder, wireless charging for that device is not possible.

The wireless charger only supports cases that match the iPhone magnet.

Do not place any foreign objects between the device and the surface of the wireless charger, including metal pads on the car mount, magnetic cards, keys, coins, metal objects or NFC cards, as this may demagnetize the wireless charger and affect the charging speed or cause overheating.

Wireless chargers are more convenient than wired chargers. However, the charging speed is slower than wired chargers due to the limitations of current wireless technology.
