6

※ Caution

If camera registration fails, you need to go back to the Wi-Fi settings, disconnect the "EGLOO_CAM_XXXX" connection, and restart registration from no.5.

12 Select service and tap "Complete"

- Please enter camera name and select storage method.
: SD card or Cloud Service.

13 Select the camera, and Enjoy!

2. QR Code Registration

7

1 Tap "Register by QR code"

- If registration fails, you can register using a QR code. In the Failed Camera Registration window, please press the "Register with QR Code" button at the bottom.

2 Enter Wi-Fi information

- Please enter a correct name (SSID) and password for Wi-Fi.
- ※ (Please enter capital, small letter and special character correctly.)

3 Scan QR Code

- Please try scanning the QR code that appears on your smartphone at a distance of 5~10cm from your camera.
- Please continue scanning until you hear the 'harmonic' sound from the camera.

3. How to Reset

8

Micro SD Card

Reset Bottom

Red LED

※ With the camera powered on, please press the reset button for about 10 seconds.

※ When the LED light turns red, camera has been reset successfully.

FCC Statement

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- This equipment complies with fcc radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator&your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
