

Description of Permissive Change

1. This report is prepared for FCC class II permissive change. The difference compared with the original one is the component change of the DC regulator from 5V to 3.3VDC transfer. Two new antennas with 2dBi and 1dBi gain have been also included in this filing. The metal shield inside the housing has been added too.

2. Add one more new model name as shown as following:

Product Name	Model No
Wireless 22Mbps Access Point	GL2422AP-0T1

3. After original one do the FCC class II permissive change, there is one more model added to this report (please see Desc. 2) and also is prepared for FCC class II permissive change. The difference compared with the original one is the outer appearance of the EUT and non-shield of mental.
