

Remote control

1.Features

1. simple appearance can be applied to different decoration styles.
2. split button, more convenient operation.
3. Button backlight design.
4. Anti-wear anti-scratch material.
5. Ultra-low power design.
6. AAA(7#) battery, more convenient to install and buy.
7. wall fixed seat, more reliable installation.

2.Parameters

Model	RF transmit frequency	RF remote control distance	Transmit power	Transmit current	Stand by current	Battery	Working temp.	Size
AC014-11A	455.92MHz / 410MHz	≥60m	≤10mW	≤20mA	≤1uA	AAA(7#)×2	-20℃~+55℃	72×45×15mm 21.2×11.1×1.1

3.Installation

- 1.The minimum distance between the launcher and the ground is 1.5m.
- 2.The minimum distance between the receiver and the transmitter 1m.
- 3.Do not install on metal objects, Otherwise, the launching distance will be affected.
- 4.Do not install in wet and exposed places,Otherwise, it will affect the service life of the machine.

Cautions

While complying with the standards for efficient use of electricity, please comply with the following requirements:

- * Transmitter range within 80 meters of open space;
- * Avoid static interference, static electricity will damage some electronic components;

4. Operations

- 1) Control
 Join + button Up/In - Control
 Stop key/Stop
 Forward + button - Control
- 2) Channel selection
 Right frequency key, channel increment
 Left frequency key, channel decrease
- 3) Frequency locking (64 frequency and
 16 frequency available)
 - frequency lock: press the "Stop key" + any "frequency
 select key" into the indicator light (p. about 3 seconds)
 If: lock the frequency of the current channel, after locking
 the current channel, other: adjust number of channels
 of the transmitter the channel after the current channel
 will not be available.
- Unlock frequency: under any channel, press the "Stop
 key" + any "frequency selection key" again until the
 indicator light is (p. about 3 seconds) lighting. The channel

5.Trouble shooting

Problems	Analysis	Solutions
When operating the transmitter, the receiver no react	1. The receiver is not working properly 2. The battery of transmitter is out of power	A. The receiver works normally B. Replace a new battery of transmitter
The receiver is not working properly	The battery of transmitter is out of power	Replace a new battery of transmitter

Cautions

- ☐ The statement: Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children.
☐ The statement: Dispose of batteries in household trash or incinerator.
☐ The statement: Used batteries may cause severe injury or death.
☐ The statement: Call a local poison control center for treatment information.
☐ A statement indicating the rechargeable battery type (e.g., Ni-MH, Ni-Cd, Ni-Zn, NiOx, etc.).
☐ A statement indicating the nominal battery voltage.
☐ The statement: Non-rechargeable batteries are not to be recharged.
☐ The statement: Do not fire, disassemble, recharge, disassemble, heat above the manufacturer's specified temperature rating or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.
☐ The statement: Ensure the batteries are installed correctly according to polarity (+ and -).
☐ The statement: Do not mix old and new batteries, different brands or types of batteries, such as alkaline, carbon-zinc, or rechargeable batteries.
☐ The statement: Remove and immediately recycle or dispose of batteries from equipment not used for an extended period of time according to local regulations.
☐ The statement: Always completely secure the battery compartment. If the battery compartment does not close securely, stop using the product, remove the batteries, and keep them away from children.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This document contains information which may be exempt from public release under the Freedom of Information Act, 5 U.S.C. § 552.

This equipment has been tested and found to comply with the limits for a Class 2 digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to take one of the following measures to correct the interference: reorient or relocate the receiving antenna; increase the separation between the equipment and the receiver; use a different power outlet, not on the same circuit as the receiver; or consult a radio/television technician for additional suggestions.

- When can be determined by finding the equipment in the range of the user is receiving signal from the base station
 - decrease the separation between the equipment and receiver.
 - Connect the equipment into an outdoor or a small different from half to which the receiver is connected.
 - Change of the dealer in an extended radius. A change in the path

This device contains license-essential information for the following conditions: 1) This device may not cause interference, and 2) this device must accept any interference, including interference from other licensed devices.

Le dispositif a été évalué conformément aux exigences requises.
