1. FCC Info

FCC ID: 2ADNG-NF130 Model: NF-130.

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

This device complies with Part 18 of the FCC Rules. Operation is subject to the following conditions: If this device causes interference to radio or television reception or to other electronic equipment, which can be determined by turning the NF-130 charger off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

CAUTION: Changes or modifications not expressly approved by Energous may violate FCC Rules and negate your authority to operate this device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

2. RF Exposure Notice

The NF-130 Charger requires all persons to be at least 10 cm away from the charger at all times except when placing or removing the device to be charged.

3. Intended Use

- Reorient or relocate the equipment being interfered with.
- Increase the separation between the NF-130 charger and the equipment subject to interference.
- Connect the equipment into an outlet on a circuit different from that to which the NF-130 charger is connected.
- Consult the dealer or an experienced radio/TV/electronics technician for help.

User Manual and User Information Model NF-130, rev. 3

1. The purpose of the NF-130 Charger is to charge equipment outfitted with the proprietary Energous energy receiving circuits. The NF-130 Charger can only be used in conjunction with devices that contain the receiving circuits for charging the native batteries of the equipment.
2. If a device that does not contain the Energous receiver circuits no charging will ensue and the NF-130 Charger will not operate.
3. Equipment outfitted with inductive receiver circuits will not charge and the NF-130 Charger will not operate.
4. Indoor operation only --not to be used in a wet area or outdoors.

4. User Operation

The NF-130 does not contain a power switch. Simply connect the mini-USB cable end to the NF-130 Charger and the USB-2 cable end to the wall adapter power supply. When not charging, the NF-130 is in standby mode.

Place the equipment to be charged on top of the NF-130 charger. The equipment will commence charging within a few seconds. Consult the equipment's user manual for the time duration and procedures for charging.

5. Mini USB Port

Insert the designated cable at the mini USB port of the Energous charger and also into the type A USB port of the electrical AC wall power supply adapter to connect the Energous Charger.
