**Class 2 Permissive Change request**  
**FCC ID: 2ABBZ-RF-MDWS**

To whom it may concern:

Class 2 permissive change is being requested due to the following changes:

- Minor non-RF circuitry added to allow connection of sensor to activate device. Activation will be identical to pre-existing magnetic reed switch which currently activates device. No change to antenna, amplifier, or crystal occurred. All RF circuitry remains identical to devices currently in family.
- Minor changes to firmware to accommodate added functionality. Changes will not affect RF signals in any way.

Yours sincerely,

Company Officer: Joel Christianson
