

Hi Mohammad

This is in response to your correspondence answering my questions. Part 2.1049 uses the 1% of energy is outside the bandwidth having .5% on either side of the bandwidth.. However, when a specific rule part is used (i.e. Part 24), compliance must be to that rule part. Part 24 specifically states that it is the 26dB down that must be used. The values of 2.1049 then are not relevant to the emissions bandwidth required in Part 24. Thus, the 23dB bandwidth cannot be used, it must be the 26dB bandwidth. I understand that there is not much difference in this, but it is the rules that must be met in the certification process.

Thanks

Dennis

<p>Hi Dennis

<p>I have consolidated our clarifications on your latest comments on our

application Ref. FCC ID: AB6UMTS1900IND and the correspondence letter is

uploaded to the ATCB server. Note that the updated Form 731 and a letter

requesting confidentiality is also submitted.

<p>Please let us know if additional information is required.

<p>Sincerely

<p>Mohammad S. Hossain

<p>Hi Mohammad

I can finish the issuance of this grant as soon as you have responded to the

attached information request.
<p>Thanks

Dennis
