

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) sits on a white cabinet. A thick orange cable connects it to a smaller device on the floor. This device is placed on a yellow and black striped mat. To the right, a wooden table holds a power strip with a pink plug. The background shows a white wall with electrical outlets and a vertical yellow and black striped safety pole.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup inside an anechoic chamber. The walls are covered with white, square-shaped electromagnetic absorbers. In the center, a white, box-like test item is placed on a stand. A large, black, rectangular metal frame is positioned around the test item. The floor is dark and reflective.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
