

Know your phone

About Android

An Android phone can perform many of the same functions as a computer. But you can also adjust it to better suit your needs, to receive the information you want, and have fun at the same time.

You can:

- Add and delete applications, or enhance them to improve functionality.
- Download applications and games from in the Android market
- Integrate applications on your Android phone with your personal data and online accounts. (as backing up your track of appointments, engaging in as much social networking as you like.)

Applications

An application is a phone program that helps you perform a task. For example, there are applications to make calls, take photos and download more applications.

Note:

The colors and specifications shown/mentioned in the user manual may differ from the actual product. Images shown are for representation purpose only.

The content of the manual is correct when it is released, but we reserve the right to modify the technical specification without additional notification.

Some content in the manual may be different from the mobile phone, as the accessory software, SIM card or service varies by providers.

1. Getting started

1.1. Insert SIM card& Memory card

- ① Push the holder in the SIM card slots next to the thimble hole it pops out .
- ② Place the SIM cards face down and align it with the opening of the holder .
- ③ Insert them into the SIM card slots of the phone properly.

1.2. Charge up

To charge the battery, plug in the charger connector at your phone (USB interface) and then plug the other end into an AC power socket.

The battery symbol indicates the charging status. While charging, the charge indicators will scroll. When all the scroll bars are steady, the battery is fully charged. Disconnect the charger from the phone or disconnect the charger from the AC power socket.

1.3. Key tips

1.3.1. Power/Lock key

- ② Touch the number pad, you can make calculations.
- ③ Slide by moving your finger left on the touch screen can switch to the advanced panel.

5.4. WLAN Networks

WLAN is a wireless networking technology that can provide internet access at distance of up to 100 meters. To use WLAN on your phone, you access a wireless access point, or “hotspot”. Some hotspots are open and you can simply connect to them. Others are hidden or implement other security features, so you must configure your phone so it can connect to them.

TIP: Turn off WLAN when you are not using it, to extend the life of your battery.

5.4.1. Connect to WLAN Network

- ① Touch **Launcher** icon, and from Application menu, touch **Settings**.
- ② Touch **Wi-Fi**.
- ③ Check WLAN to turn it on. The phone scans for available WLAN networks and displays the names of those it finds. Secured networks are indicated with a Lock icon.
- ④ Touch a network to connect to it

If the network is secured, you are prompted to enter a password or other credentials (Ask your network administrator for details).

5.4.2. Receive Notifications

By default, when WLAN is on, you receive notifications in the status bar when your phone detects an open WLAN network.

- ① Turn on WLAN, if it's not already on.
- ② In the WLAN list screen, press Menu key to open Advanced options, check Network notification. You can uncheck this option to stop receiving notifications.

5.5. Bluetooth

Bluetooth is a short-range wireless communications technology that devices can use to exchange information over a distance of about 10 meters.

5.5.1 Turn Bluetooth On/Off

- ① Touch **Launcher** icon, and from Application menu, touch **Settings**.
- ② Touch **Bluetooth**.
- ③ Check or uncheck Bluetooth to turn it on or off.

Important: Go to Bluetooth and check option so that your phone can be detected by other devices.

5.5.2. Pair with Bluetooth Devices

You must pair your phone with a device before you can connect to it. Once you pair your phone with a device, they stay paired unless you unpair them.

- ① Touch **Launcher** icon, and from Application menu, touch **Settings**.
- ② Touch **Bluetooth**.
- ③ If Bluetooth is not turned on, check Bluetooth to turn it on. Your phone scans for and displays the IDs of all available Bluetooth devices in range.
- ④ If the device you want to pair with is not in the list, touch **SEARCHING**.
- ⑤ Touch the ID of the desired device in the list to pair it.

7. Warning

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Information:

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device Type X555 (FCC ID: 2AIZN-X555) has also been tested against this SAR limit.

The highest SAR value reported under this standard during product certification for use when properly worn on the body is 0.438 W/kg and for head is 0.513 W/kg. Simultaneous RF exposure is 0.804 W/Kg.

This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset.

The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
