Important Safety Instructions
The applied nameplate is located at the bottom of the Baby Unit's base.
When using your equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

- Follow all warnings and instructions marked on the product.

- 2. Adult setup is required.
  3. CAUTION: Do not install the Baby Unit at a height above 2 meters.
  4. This product is not a substitute for adult supervision of the infant. Supervising the infant is the parent's or caregiver's responsibility. This product could cease operating, and therefore you should not assume it will continue working properly for any given period of time. Further, this is not a medical device and should not be used as such. This product is intended to assist you in supervising your baby.
  5. Do not use this product new water. For example, do not use it next to a bath tub, wash bowl, kitchen sink, laundry tub or swimming pool, or in a wet basement or shower.
  6. CAUTION: Use only the battery provided. There may be a risk of explosion if a wrong type of battery is used for the Parent Viewer. The battery cannot be subjected to high or low extreme temperature and low air pressure at high allitude during use, storage or transportation. Disposal of battery into fire or a hot oven, or mechanically crushing or cutting or the battery can result in an explosion. Leaving the battery in an extremely high temperature surrounding environment can result in an explosion. environment can result in an explosion or the leakage of flammable liquid of gas. Battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas. Dispose of used battery according to the information in The RBRC seal.
- Use only the adapters included with this product. Incorrect adapter polarity or voltage can seriously damage the

# 8. The power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not In power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a celling, under-the-table or cabinet outlet. For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily accessible. Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosal cleaners. Use a damp cloth for cleaning. Do not cut off the power adapters to replace them with other plugs, as this causes a hazardous situation. Do not allow anything to rest on the power cords. Do not install this product where the cords may be walked on or crimed.

- roduct should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home, consult your dealer or local power comp l. Do not overload wall outlets or use an extension cord.
- . Do not place this product on an unstable table, shelf, stand or other unstable surfaces . This product should not be placed in any area where proper ventilation is not provided. Slots and openings in the
- back or bottom of this product are provided for ventilation. To protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be

- not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiation or heat register.

  7. Never push objects of any kind into this product through the slots because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.

  8. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing parts of the product other than specified access doors may expose you to dangerous voltages or ofther risks. Incorrect reassembling can cause electric shock when the product is subsequently used.

  7. Vay abould test the sound reception every time you turn on the units or move one of the components.

  7. Periodically examine all components for damage.

  7. There is a very low risk of privacy loss when using certain electronic devices, such as baby monitors, cordless telephones, etc. To protect your privacy, make sure the product has never been used before purchase, reset the baby monitor periodically by powering off and then powering on the units, and power off the baby monitor if you will not use it for some time. use it for some time.
- en should be supervised to ensure that they do not play with the product.
- 23. The product is not intended for use by persons (including children) with reduced physical, sensory or mental

### 2. Charge the Parent Viewer battery before use

When you connect and turn on the Parent Viewer, the battery charges automatically.

### Notes:

- Before using the baby monitor for the first time, charge the Parent Viewer battery for 12 hours
- The standby time varies depending on the Baby Unit sensitivity levels you set for Auto Wake-Up. your actual usage time and the age of the battery.

The battery icon on the screen indicates the battery status (see the following table).

Battery Indicators	Battery Status	Action
The screen displays	The battery has very little power left and may only be used for a short time.	Charge without interruption (about 30 minutes).
The battery icon becomes solid	The battery is fully charged.	To keep the battery charged, connect it to AC power when not in use.

# Administration, W. I. Recommends to physicians that: \*Recenaker patients \* Should keep wireless devices at least six inches from the pacemaker. \* Should NOT place wireless devices directly over the pacemaker, such as in a breast pocket, when it is turned ON. the power source again.

Make sure the product is dry before you connect it to

Never try to dismantle the unit. Avoid prolonged exposure to extreme temperatures and direct sunlight or moisture.

• Avoid dropping the product or treating it roughly.

# Protect your privacy and online security

LeapFrog cares about your privacy and peace of mind. That's why we've put together a list of industry recommended best practices to help keep your wireless connection private and your devices protect when online. We recommend you carefully review and consider complying with the following tips.

Ensure your wireless connection is secure. Before installing a device, ensure your router's wireless signal is encrypted by selecting the "WPA2-PSK with AFS" setting in your router's wireless security menu

Change default settings.

Change your wireless router's default wireless network name (SSID) to something unique. Change default passwords to unique, strong passwords. A strong password:

- Is at least 10 characters long.

- Does not contain dictionary words or personal information. - Contains a mix of uppercase letters, lowercase letters, special characters and numbers.

Geep your devices up to date. Download security patches from manufacturers as soon as they become available. This will ensu you always have the latest security updates.

If the feature is available, enable automatic updates for future releases.

Disable Universal Plug and Play (UPnP) on your router. UPnP enabled on a router can limit the effectiveness of your firewall by allowing other network devices to open inbound ports without any intervention or approval from you. A virus or a malware program could use this function to compromise security for the entire network.

or more information on wireless connections and protecting your data, please review the following sources from industry experts: Federal Communications Commission: Wireless Connections and Bluetooth Security Tips -
