**Subject:****Modular Approval Statement****Date:** **October 16, 2024****FCC Certification Number:** **SQG-SONATI351***Only applicable for ISED certification:***ISED Certification Number:** **3147A-SONATI351****PMN: (Product Marketing Name)** **Sona TI351****HVIN (Hardware Version Identification Number):** **Sona TI351****FVIN: (Firmware Version Identification Number)** **N/A****HMN: (Host Marketing Name)** **N/A****TO WHOM IT MAY CONCERN**

Pursuant to Annex D in RSP-100 and CFR § 15.212, we herewith declare for our module.

<b>Modular approval requirement</b>	<b>Yes</b>	<b>No *</b>
(a) The radio elements must have the radio frequency circuitry shielded. Physical/discrete and tuning capacitors may be located external to the shield, but must be on the module assembly.	X	
<b>*Please provide a detailed explanation if the answer is "No.":</b>		
(b) The module shall have buffered modulation/data input(s) (if such inputs are provided) to ensure that the module will comply with the requirements set out in the applicable RSS / part 15 under conditions of excessive data rates or over-modulation.	X	
<b>*Please provide a detailed explanation if the answer is "No.":</b>		
(c) The module shall have its own power supply regulation on the module. This is to ensure that the module will comply with the requirements set out in the applicable standard regardless of the design of the power supplying circuitry in the host device which houses the module.	X	

<b>*Please provide a detailed explanation if the answer is "No.":</b>		
(d) The module shall comply with the provisions for external power amplifiers and antennas detailed in the applicable RSS standard as well as FCC parts §15.203, §15.204(b) and §15.204(c). The "professional installation" provision of §15.203 is not applicable to modules but can apply to limited modular approvals. The equipment certification submission shall contain i) a detailed description of the configuration of highest antenna gain for each type of antenna. ii) the maximum transmitting antenna gain for license modules iii) a detailed description of the configuration of lowest antenna gain for each type of receiving antenna for Dynamic Frequency Selection (DFS) modules with removable antenna(s)	X	
<b>*Please provide a detailed explanation if the answer is "No.":</b>		
(e) The module shall be tested for compliance with the applicable standard in a stand-alone configuration, i.e. the module must not be inside another device during testing.	X	
<b>*Please provide a detailed explanation if the answer is "No.":</b>		
(f) The module shall comply with applicable RSS-102 exposure requirements and any applicable FCC RF exposure requirement which are based on the intended configuration/integration in a host.	X	
<b>*Please provide a detailed explanation if the answer is "No.":</b>		
<i>Only applicable for FCC certification:</i> (g) The module must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	X	
<b>*Please provide a detailed explanation if the answer is "No.":</b>		
(h) The modular transmitter complies with all applicable FCC rules. Instructions for maintaining compliance are given in the user instructions.	X
