

Request for addition of LTE-U to existing LAA Grant

Date: February 9, 2017

Type 1 Permissive Change Request for:

FCC ID: 2AD8UFW2RADPM01

To Whom It May Concern,

Pursuant to FCC 47 CFR 2.1043 (b) (1), Nokia Solutions and Networks requests that the existing LAA Grant be modified to include LTE-U functionality. It should be noted that Nokia's Small Cell hardware is common between LTE-U and LAA, and that any changes to the operating software installed to support LTE-U operation do not affect the radio frequency emissions.

Additionally, Nokia has completed WFA testing at an accredited 3rd party lab and has met all WiFi co-existence test criteria.

In conjunction with previous correspondence with the commission regarding the addition/inclusion of LTE-U functionality to our existing LAA FCC grant of approval, the following items are being submitted as requested.

- **Cover letter**
- **Operating Software Description (identical to original Grant)**
- **LTE-U Addendum to Theory of Operation**
- **Updated Theory of Operation**

We look forward to the approval of this request enabling subsequent follow-up by our TCB to reissue the updated FCC Grant

Sincerely yours,

(Signature)

Terry Schwenk
