RE: FCC ID: GMLNPB-1NB

Attention: Nerina Walton / Alan Ewing 972-

I have a few comments on this Application.

1. Please note that while some manufacturing variations are allowed in the power of a certified device, the test report for this PC2 shows a power level almost $\frac{1}{2}$ that as listed on the grant. The power on the original grant is 1.35W and the power reported in the report for this PC2 is 0.822W. IS the difference between the original grant power and the power in this PC2 due to manufacturing variations, or is it due to the changes in the device? Please explain.

Dennis Ward
