

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer. A red cable connects it to a power line interface unit (PLI) on the floor. The PLI is connected to a power strip and a power source. A black mat is on the floor next to the PLI. On the right, another wooden workbench has a small black device on it.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test chamber. The chamber is lined with white and blue electromagnetic interference (EMI) absorbers. A metal frame structure is inside the chamber, and a small white table is positioned in the background. A yellow and black striped caution tape is on the floor.
