### **CS100 Coast station**

#### **Justification for use of SRT Carbon test reports**

The CS100 Coast-station is an AIS AtoN developed using the electronic circuitry and software from the SRT Marine Technology Ltd Carbon AtoN which has been certified for R&TTE, FCC, USCG, IC and BSH and verified by USCG.

SRT Marine Technology declares that CS100 Coast-station uses the identical AIS AtoN Module as the Carbon series AtoN but placed within a new aluminium enclosure with the inclusion of a LAN function.

The test reports provided within this TCF from the Carbon AtoN and those specifically tested as the CS100 Coast-station Type 3 AtoN provide evidence of compliance to the required standards, thus ensuring the CS100 Coast-station AtoN meets the requirements the relevant standards and the R&TTE Directive, USCG, FCC, IC, and BSH
