## 1 Package contents

- amanTag PSA 3 tag
- Quick start guide

## 2 Tag installation

The tag must be installed by a trained amanTag system administrator. The tag will be automatically added to the database of a pc-based system when installed within range of an amanTag receiver.

## 3 Tag usage

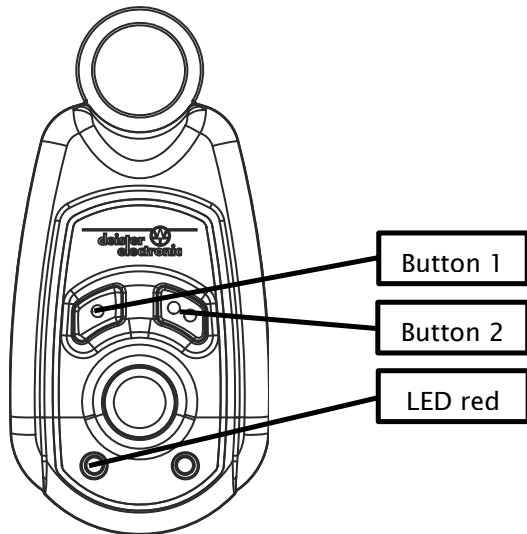

The tag can be attached as follows:

- On a keyring
- As an amulet

Once properly installed the Tag functions automatically providing the system with activate/response data to locate its position. The user or equipment need do nothing else; just carry the Tag with the item or person to be position located.

The command buttons on the tag have a variety of possible functions depending on the configuration selections of the amanTag system administrator who will provide the appropriate functionality on tag assignment.

## 4 Panel

The panel of the tag consists of three buttons and two LEDs.

## 5 LED-light of the tag

- The red LED will flash to confirm when the button is pressed.
- The red LED blinks during internal calibration after a battery change.
