

# models different letter

Date: December 30, 2024

Dear Examiner,

The two models use the same WIFI solution, and RF matching circuits in main board in both projects are almost same also. So the PCB layout of G-0126G-A RF components is almost identical to G-1426G-D.

The two models use the same antenna and the almost same shell. At the same time, the main components are almost same.

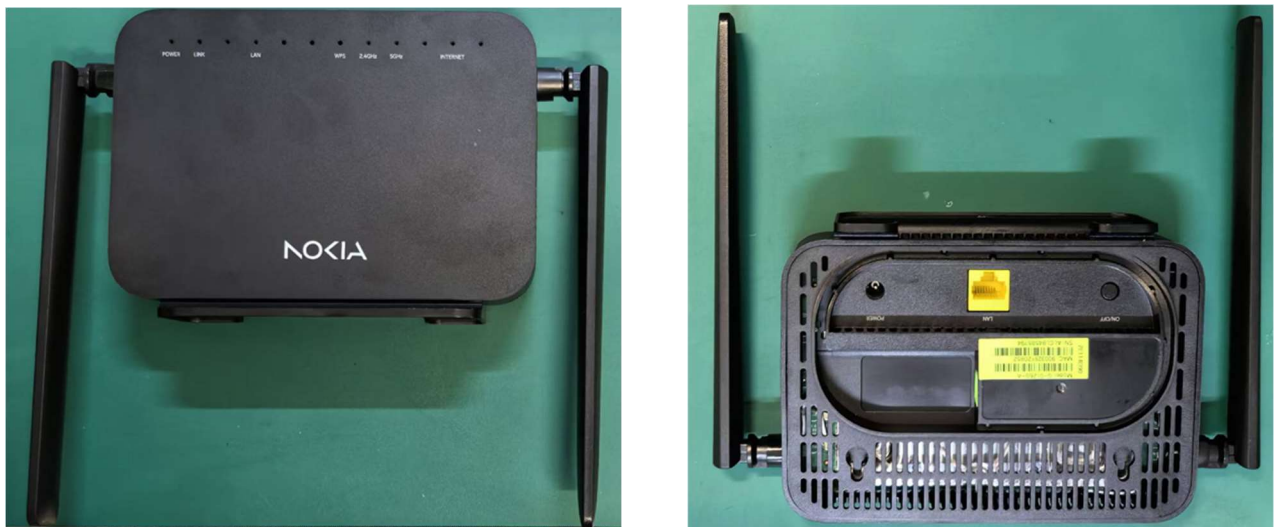

The main differences between the two models are described below:

- 1) G-1426G-D has 4 GE ports, G-0126G-A only have one GE port.
- 2) G-1426G-D has 1 POTS port, G-0126G-A do not have POTS port.

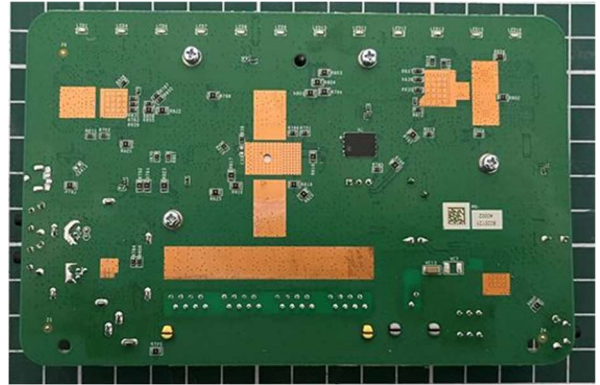

G-1426G-D

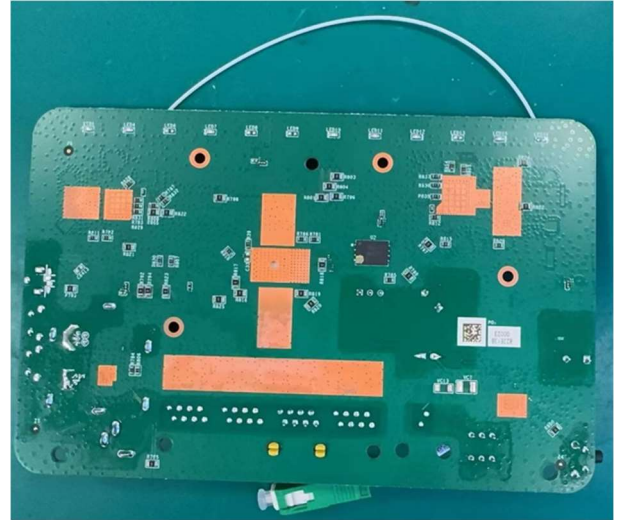

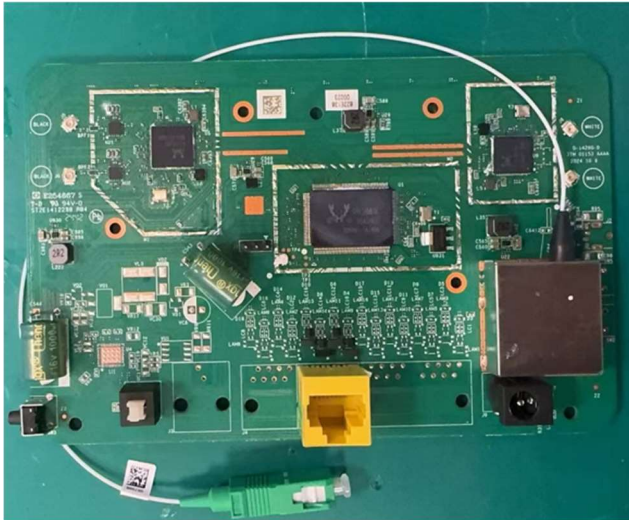

G-0126G-A

G-1426G-D

G-0126G-A

Sincerely yours,

Yong Tu
